LEISTON-CUM-SIZEWELL URBAN DISTRICT COUNCIL

To: The Chairman and Members of the Leiston-cum-Sizewell Urban District Council.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report on the health of the Urban District of Leiston-cum-Sizewell for the year 1971.

The year under review showed a drop in the population from 5,200 to 4,970 thus reversing a trend of increasing population for the past few years. There has been also a drop in the number of births in the District, which again is a reverse in the trend of the past few years. The number of deaths is slightly down on the previous year, but the figure is much the same as the average over past years. The adjusted birthrate of 13.8 is considerably below the national average of 16.0. The adjusted deathrate of 8.6 is well below the national figure of 11.6. All of which means that the population of the District is tending to be a somewhat more aged one.

The causes of death are typical of the pattern for the Country as a whole, Cerebrovascular Disease and Ischaemic Heart Disease being the principle cause.

Last year there were three deaths from Cancer of the lung; this year there were five. These are small figures, but their trend justifies repeating the warning of the danger of excessive cigarette smoking.

Only ten cases of measles were reported during the year, compared with thirty the year before. One hopes that a contributory factor in the drop, is that increasing use is being made of the facilities now available for immunisation against this infection.

There are now only six cases on the T.B. Register, one case was removed, but unfortunately a new case of tuberculosis took its place.

The section of the report dealing with the local sanitary authority work in the District has been prepared by your Public Health Inspector's and I refer you to that for details of the work carried out in this sphere of the Departments activities.

May I express to you Mr. Chairman and to members of the Council, my appreciation of the interest you have shown throughout the year in the work we have undertaken.

I have the honour to be,  
Your obedient servant,

Arthur C. Gee.

Medical Officer of Health.

### OPINION

This water is of very good organic quality and there is no chemical evidence of pollution. The analysis is similar to that of the sample taken in 1969 (our Cert. No. V.262) except that the total dissolved solids are 50p.p.m. higher. In our opinion this water is suitable for drinking and general purposes.

A copy of a typical result from the raw and treated water is as follows:-
